The 28 series is one of ASCO's best sellers. It can be used for a variety of purposes; laptop desk, computer table or teacher's desk. This series can be combined in an infinite array of workstation styles and features twin 1x2" rectangular uprights welded to 1x2" vertical horizontals.

It is a favorite of schools and universities across the country for its flexibility, durability and customizable options. The 28 Series can be used to design labs and classrooms. This series can be customized with sliding keyboard trays, standing or adjustable height options, CPU holders, wire management grommets, split level work surfaces, laptop storage, shelving, keyboard trays, castors, and more.

Keyboard Shelf

The 51 series is a remake of an ASCO classic table featuring twin 2" round uprights welded to a 2" round horizontal. It is frequently used in educational environments as workstations or laptop tables, in computer labs and even in chemistry labs.

The 51 series combines nicely with post legs to allow for the build-out of more elaborate workstations.

Vertical options on this table include T2 offset, C2 flush or centres twins.

The twin element gives you the ability to upgrade this table with the CHANNELS concept, inserting the vertical infills of your choice, for complete aesthetic control.
